

PRODUCT PACKAGING

All KOUVIDIS products have distinctive labelling on their packaging and are easily traceable. The color of the label indicates the type of the product (especially for single wall conduits) while the information mentioned refer to its characteristics and mechanical strengths. The color identity for each product family facilitates installer and retailer work providing easiness when storing and distributing.

Single wall conduit packaging

Rigid conduits are packed in bundles with the use of recyclable protective film with color id (blue, red and light blue colors refer to heavy, medium and light type mechanical strength respectively). Pliable conduits are packed in coils using shrink-wrapping recyclable film and six WHITE safety straps. For pliable conduits we use the same color id by coloring each label.

Multi layer conduit packaging

Rigid conduits are packed in bundles with the use of recyclable protective film. Pliable conduits are packed in coils using shrink-wrapping recyclable film and six BLACK safety straps except DUROFLEX PLUS where we use white straps.

Conduits intended to be buried underground

Rigid conduits are packed in 6m bundles where their label is affixed in the inside layer of the one end. Pliable conduits are packed in coils with the use of six safety straps. For GEONFLEX N750 we use WHITE straps. For GEOSUB N450 we use BLACK straps. Each label on pliable conduits has two sides (front and back).
