NEW PRODUCTS

Conduit system

DUROSOL® PLUS – DUROFLEX® PLUS

Ø16 – Ø32

The elevated version of a stellar product

The enhanced double structured wall conduits DUROFLEX® PLUS combine the advantages of both corrugated pliable and rigid plastic conduits, and thus become the definite solution for cable protection in challenging concealed electrical installations, such as **concrete**, **underfloor in screed** and **thermal facade**.

The outer layer is corrugated offering the necessary flexibility, whilst the inner layer is smooth, making the cable routing much easier. A third layer of longitudinal lines, of indelible color, distinguishes power from telecommunication cables. DUROFLEX® PLUS is medium type in resistance to compression (750Nt) and impact resistance (2J) and incorporates enhanced protection against UV radiation. Moreover, DUROFLEX® PLUS conduits are halogen free, low smoke and have a low friction coefficient of up to 50%.

Integrated plastic conduits system for cable protection

Along with the new 3layer rigid conduit DUROSOL® PLUS, the fittings (connection coupler, clip, adaptor) and junction boxes with seals and grommets, all in black color RAL 9004, they compose a special conduits system which is capable of meeting a plethora of needs at the installation field.

NEW PRODUCTS

Conduit system

MEDISOL® PLUS – MEDIFLEX® PLUS

Ø16 – Ø32

The new upgraded medium type 750Nt halogen free series with anti-electromagnetic technology

The new conduit system MEDISOL® PLUS - MEDIFLEX® PLUS is produced in light grey RAL 7035 and consists of the double layer rigid conduit MEDISOL® PLUS, the double layer corrugated pliable conduit MEDIFLEX® PLUS and all the fittings of the CONDUR® series (adaptors, clips and junction boxes). The new product series has its MEDISOL® PLUS couplers and is compatible with the existing CONDUR® HF halogen free bends.

The new conduit system MEDISOL® PLUS - MEDIFLEX® PLUS replaces the discontinued MEDISOL® HF - MEDIFLEX® HF conduit system.

NEW PACKAGING

Less volume
more storage for
a more **sustainable future**

70%
reduction of
plastic per year
(15 tons/year)

45%
savings on
transport
costs

45%
storage space
savings

One of our main goals in relation to the strategic sustainability we embrace is the reduction of waste that is created from our products' packaging. Following this path, we developed internally a new way of packaging with the use of less plastic, up to 75%, which we firstly applied to the multilayer conduits that we introduced in 2020.

After further research and investments to new mechanical equipment we managed to adopt the same technology to the rest pliable conduits, minimizing essentially the waste created by their packing, up to 15 tones plastic per year, and thus enhance our environmental footprint.

NEW PACKAGING

Simultaneously, we provide added value to our clients and to the end-consumer of our products, the electrician, by minimizing substantially the packaging mass up to 45%. This secures more storage as well as an essential reduction to the transportation costs.

The new packages of our pliable conduits consist of heat shrinkable recyclable film in which are placed perimetrically 6 safety hoops, that provide their necessary stability and protection during storage, transportation and usage.

Plastic piping systems Ground drainage

SN4|SN8

Plastic piping systems for Ground drainage

GEODRAIN® PLUS subsoil drainage

GEODRAIN® PLUS is a new generation 4-layered conduit for drainage produced in coils of 50m and 25m and in 6m bars with SN4 & SN8 ring stiffness. GEODRAIN® PLUS are structured double wall conduits and symmetrically perforated at 220° and 360° for the rigid and pliable conduits accordingly. The first layer consists of its smooth interior surface which facilitates the smooth flow of water while the second layer consists of its corrugated exterior which provides flexibility and mechanical resistance. The 3rd layer consists of 4 longitudinal blue lines for the color identification of water. GEODRAIN® PLUS is offered with pre-installed needle-punched, non-woven geotextile (150gr/m²) which is its 4th layer.

They are suitable for subsoil drainage at all types of residential buildings, stadiums and surrounding areas, industrial and commercial applications, photovoltaic parks, agricultural applications, landfills, uncontrolled landfills and road networks.

CLASSIFICATION CODES

Classification code for conduit systems for buried underground

According to EN 61386-24

The classification code for buried underground conduits is made of 2 elements according to EN 61386-24 and determines the conduit's main properties. The first element is the letter "L" or "N" which classifies the conduit according to its impact resistance whereas the second one is a three digit number 250 or 450 or 750 which classifies it according to its compression resistance. Classification code is demonstrated on the table below:

| Nominal size of conduit | Light Duty (L) | | | Normal Duty (N) | | |
|-------------------------|----------------------------|-------------------------|----------|----------------------------|-------------------------|----------|
| | Mass of striker kg (+1/0)% | Fall height mm (+0/-1)% | Energy J | Mass of Striker kg (+1/0)% | Fall height mm (+0/-1)% | Energy J |
| ≤60 | 3 | 100 | 3 | 5 | 300 | 15 |
| 61 to 90 | 3 | 200 | 6 | 5 | 400 | 20 |
| 91 to 140 | 3 | 400 | 12 | 5 | 570 | 28 |
| >140 | 3 | 500 | 15 | 5 | 800 | 40 |

| Classification | Compression strength (Nt) |
|----------------|---------------------------|
| Type 250 | ≥250 |
| Type 450 | ≥450 |
| Type 750 | ≥750 |

Classification code for conduit systems

According to EN 61386.01

The classification code is made of 14 digits, according to EN 61386.01, and determines conduits main properties. The first 5 digits are the most usually displayed at marking and classify conduits according their compression resistance, impact resistance, minimum and maximum operating temperature and bending resistance. Classification code is demonstrated on the below table:

Classification code (acc. to EN 61386)

Description of the 5 first primary digits of the total 14 that classify a conduit

| Class | 1st DIGIT | | 2nd DIGIT | | 3rd DIGIT | 4th DIGIT | 5th DIGIT |
|-------|---------------------------|----------------------|----------------------|----------------------|---|---|---------------------------|
| | Resistance to compression | Resistance to impact | Resistance to impact | Resistance to impact | Min. permanent application-installation temperature | Max. permanent application installation temperature | Resistance to bending |
| 1 | | | | | +5 °C | +60 °C | Rigid |
| 2 | Light | 320 | Light | 1.0/100mm | -5 °C | +90 °C | Pliable |
| 3 | Medium | 750 | Medium | 2.0/100mm | -15 °C | +105 °C | Pliable / self-recovering |
| 4 | Heavy | 1250 | Heavy | 2.0/300mm | -25 °C | +120 °C | Flexible |
| 5 | Very heavy | 4000 | Very heavy | 6.8/300mm | -45 °C | +150 °C | |
| 6 | | | | | | +250 °C | |
| 7 | | | | | | +400 °C | |

TRANSACTION TERMS

The following transaction terms apply to all services EMM. KOUVIDIS SA provides (hereinafter referred to as "COMPANY"), apart from special cases which are followed by written agreements. The COMPANY has every right to change or correct the transaction terms by accordingly written notice. This document (version 07.2024) contains Ex Works Heraklion Crete prices (Incoterms 2020), excluding VAT and abrogates any previous version.

BUSINESS ASSOCIATES

The COMPANY cooperates exclusively with authorized wholesalers or distributors of electrical and hydraulic materials located outside the countries of Greece, Cyprus and Germany. For these countries there are separate transaction terms.

PLACING ORDERS

Orders can be placed:

- By e-mail: exports@kouvidis.gr
- By phone: +30 2810 831500

ORDER DELIVERY

The COMPANY has the following distribution centers in Greece.

- Athens: Agias Sofias, Thesi 2 Pefka, 19300, Aspropirgos
- Thessaloniki: 12 km National Road Thessaloniki - Katerini, 57400, Sindos
- Heraklion Crete: VIO.PA. Tylissos 715 00

The distribution centers are connected in line with the Exports Department and work also as delivery/loading points for export shipments.

DELIVERY TIMES

After the order's receipt, a pro-forma invoice is sent to the customer, by e-mail, with all the relevant details regarding the delivery/payment of the goods. All orders are delivered at the pre-agreed time. In exceptional cases where there is force majeure the delivery time may be extended. In this case the customer will be informed relevantly about this beforehand.

FORCE MAJEURE

If the COMPANY cannot meet the delivery times stated for the order due to force majeure such as traffic congestion, bad weather conditions, strikes, unforeseeable governmental measures, etc., its contractual obligation will be suspended and the customer will be immediately informed about how and when the order will be delivered. In any case contact Exports Department to obtain an immediate picture of the current state of your order (T: +30 2810 831500, Monday to Friday 8 am to 4 pm Eastern Time).

AVAILABILITY

If a product is not available, the COMPANY will mention it on the pro-forma invoice and will contact you immediately to inform you about the likely date on which it will be available. If you consider that the new availability date for the product is not satisfactory, you have the right to cancel your order. The remainder of the order can be delivered after making all the necessary arrangements.

ORDER CANCELLATION

An order can only be cancelled by contacting Exports Department (T: +30 2810 831500, Monday to Friday 8 AM to 4 PM Eastern Time). After that time elapses the order cannot be cancelled.

RESPONSIBILITY

If defective or non-conforming products are found, this must be reported immediately by the Receiving Officer to the Exports Department (T: +30 2810 831500, Monday to Friday 8 am to 4 pm Eastern Time). If the complaint is justified, the customer has the right to ask for a change/return of the defective products. All involved transport costs are paid for by the COMPANY.

RETURNS

If the product received is not the one indicated on the order form, the Receiving Officer must immediately contact Exports Department (T: +30 2810 831500, Monday to Friday 8 AM to 4 PM Eastern Time). Products can be returned following arrangements made with COMPANY, within 10 working days from the delivery date. The cost of return is covered exclusively by the COMPANY.

PAYMENTS

Every invoice amount must be paid within the pre-agreed period. The COMPANY maintains the following bank account where cash can be deposited:

- National Bank of Greece (Cyprus): Account Number: 100008943791

IBAN: CY2300605491000100008943791

A copy of the deposit slip must be sent to the company's Accounting Department by email to logist@kouvidis.gr in order for the relevant collection receipt to be issued and sent back.

GUARANTEES

All the COMPANY products meet the requirements contained in European standards and directives. They come with a full range of quality certificates, as follows:

- Quality Management System certificate in line with the EN ISO 9001 standard from the BUREAU VERITAS Certification body
- RoHS European directive Certificate, from the German VDE Institute, on the absence of hazardous substances.
- LVD European directive Declaration of conformity.
- Safety test certificates of full compliance with European Standards from the German VDE Institute. Please advise our official Product catalogue for the products that bring a VDE safety marks approval.

Installation guide and recommended application fields are provided provided through our official catalogue and our website www.kouvidis.com. COMPANY assumes no responsibility for any failures of electrical installations for the construction of which the above guidelines has not been taken into account.

COURT COMPETENCE

Competent courts for any dispute which may arise between the COMPANY and its customers are Heraklion Crete courts.

Our headquarters and main plant, Heraklion, Greece

With 45 years of successful presence, KOUVIDIS is one of the top manufacturers of plastic piping systems for cable protection, sewage, and drainage in Europe. The trust that we have cultivated with our customers through all these years are the main source of inspiration for the development of new products and innovative solutions that secure high quality and safety to the installer.

We are delighted to have fulfilled a multi annual investment plan for the construction of our new Smart Factory and the installation of our state-of-the-art production lines adopting the values of the 4th industrial revolution. Thus, we now look into the future with confidence and we commit to keep creating value for our staff, our customers, and our partners, whilst to contribute to the development of our society.
